DATA Analytics Training

Data Analytics for Beginners and Intermediates (Clinical & Non-clinical):

- This programme will equip learners with a deep understanding of data contextualisation, ensuring they can interpret data within the right context.
- It emphasises the importance of data quality, teaching learners how to maintain and improve the integrity of data.
- Participants will gain practical skills in data analysis, enabling them to make informed decisions based on accurate data insights.

Investment

We would recommend minimum numbers of 8 learners

Schedule:

Level 2 Mix of Excel and Power BI	Duration
Workshops (Ideally over 2 weeks as a minimum)	6 days
Validation Session	½ day
